

IN THE CLAIMS:

Please cancel claim 11 without prejudice or disclaimer. Please amend claims 2 and 6 through 10 as set forth below. Applicants note that all claims currently pending in the application are shown below for clarity.

Sub  
E1  
AT

Claim 2 (Currently Amended): A composition comprising:  
a combination of ethylcellulose and amphiphilic triblock copolymer surfactant, wherein the amphiphilic triblock copolymer surfactant consists of a triblock copolymer of ethylene oxide-propylene oxide-ethylene oxide and the combination of ethylcellulose and amphiphilic triblock copolymer surfactant includes 40 wt % to 99.5 wt % [of] ethyl cellulose[;] and 0.5 wt % to 60 wt % of [an] the amphiphilic triblock copolymer surfactant [consisting of ethylene oxide-propylene oxide-ethylene oxide];  
and a single organic solvent, wherein the ethyl cellulose and the amphiphilic triblock copolymer surfactant are each dissolved in the single organic solvent.

Claim 5 (Currently Amended): The composition according to claim 2, wherein the molecular weight of the amphiphilic triblock copolymer surfactant is 2,200 to 15,000.

Claim 6 (Currently Amended): The composition of claim 2, wherein the ethylene oxide-propylene oxide-ethylene oxide triblock copolymer comprises, on a molar basis, 3 to 20 moles of ethylene oxide.

202

Claim 7 (Currently Amended): The composition of claim 2, wherein the ethylene oxide-propylene oxide-ethylene oxide triblock copolymer comprises, on a molar basis, 45 to 80 moles of ethylene oxide.

Claim 8 (Currently Amended): The composition of claim 2, wherein the ethylene oxide-propylene oxide-ethylene oxide triblock copolymer comprises, on a molar basis, 50 to 110 moles of ethylene oxide.

Claim 9 (Currently Amended): The composition of claim 2, wherein the ethylene oxide-propylene oxide-ethylene oxide triblock copolymer comprises, on a molar basis, 70 to 130 moles of ethylene oxide.

Claim 10 (Currently Amended): The composition of claim 2, wherein the ethylene oxide-

propylene oxide-ethylene oxide triblock copolymer comprises, on a molar basis, 110 to 170 moles of ethylene oxide.
